Assignment 2 Name Andrew Stevens

1. Your target for this assignment is to share a video on your website and allow user to send feedback to you.
2. Here are specifications for this assignment.

Changes on file "index.html"

☑ In the assignment section of your index.html document, create a link which links to document "ContactMe.html".

New web document with name "ContactMe.html"

☑ Contains an embedded video in your website. You might create a video about yourself (preferred) or use videos on Youtube. However, the content of the video should be **appropriate**.

☑ Create a simple form which collects user information. Name of the form is "feedback". Your form contains:

☑ User's first name, with placeholder "anonymous " , name "fname" and attribute " required"

☑ User's last name, with placeholder "anonymous ", name "lname" and attribute "required"

☑ An email input element for user's email address, with placeholder name@domain.com and name "mail"

☑ Radio buttons that let the users choose whether they are going to recommend this website : yes or no

☑ Selection box that include user's favorite website such as: Google, Facebook, Twitter, Time,.. and so on

☑ A range element that asks user to rate the website on a scale of 1 to 10, with name "rating"

☑ A text area that asks for additional comments from the user, with name "comment"

☑ A submit button

☑ Any other HTML5 form features (at least three) that you'd like to put in the form

<input type="color" ... >

<input type="number" ... >

<input type="month" ... >

** **All of your form elements should have a name attribute *****

☐ Test your HTML document on at least three different browsers. Please comment on the difference in testing results.

Small visual differences for the input fields are visible. For Edge and Chrome, selecting fields uses a dark grey/black highlight while Firefox highlights using blue (exception w/the selection drop down on Chrome). Both the range and color elements look different on Firefox in comparison to Edge & Chrome. The month selector doesn't work like w/Chrome and Edge, on Firefox

☐ Submit your document to http://validator.w3.org/ for validation. Is your document passed? If there are any errors that you cannot fix, please put it down here.

The document passes. The only thing is there is a warning regarding missing <h1> elements.

☐ Before you submit your file, be sure to check this checklist.

☐ To submit:

○ Commit and push your files to GitHub

○ Please turn in this page with items checked to instructor on due date.
